## Introduction

The government plan is for the full return of all pupils from March 2021 (updated in line with government guidance from February 2021): <https://www.gov.uk/government/publications/actions-for-schools-during-the-coronavirus-outbreak/guidance-for-full-opening-schools>

This document has been refreshed from its previous iterations. Any hyperlinks will be identified by underlining.

Much of the content in this guidance will be familiar to you however has been updated in light of latest DfE guidance and Birmingham now being an Enhanced Area of Response (June 2021). Specific updates include:

- CEV staff (a correction to previous narrative)
- Visits/Day trips
- Sports days
- Leavers events
- Work experience

School employers and leaders are required by law to think about the risks the staff and pupils face and do everything reasonably practicable to minimise them, recognising they cannot eliminate the risk of coronavirus (COVID-19). School employers must therefore make sure that a risk assessment has been undertaken to identify the measures needed to reduce the risks from coronavirus (COVID-19) so far as is reasonably practicable and make the school COVID-secure. General information on how to make a workplace COVID-secure, including how to approach a coronavirus (COVID-19) risk assessment, is provided by the [HSE guidance on working safely](#).

We recommend all school leaders and staff members to regularly review the latest information produced by Public Health:

[https://www.birmingham.gov.uk/COVID-19\\_schools\\_faqs](https://www.birmingham.gov.uk/COVID-19_schools_faqs).

The latest checklist and flowchart can be found here for guidance on dealing with suspected or confirmed cases within staff or pupil cohorts, and their contacts: [https://www.birmingham.gov.uk/downloads/download/3527/public\\_health\\_flowchart\\_for\\_schools](https://www.birmingham.gov.uk/downloads/download/3527/public_health_flowchart_for_schools)

This risk assessment checklist/tool is based on Government guidelines on COVID-19. It is provided to help schools to prepare and decide arrangements for an increased number of children attending/returning to school. It remains subject to change at a short notice as updates are received from the Department for Education (DfE) or Birmingham City Council (BCC). [EYFS guidance](#) should be considered for Nursery Schools and Nursery Classes. Additional guidance for [Special Schools](#) (and specialist provision) should also be considered as appropriate.

Any updates to the previous Risk Assessment template going forward will be identified in the version control table from p7 onwards.

The completion of this tool/checklist should not be undertaken in isolation by one individual and should involve staff who understand the risk assessment process. Once completed, the risk assessment should be shared with the school's workforce. If possible, schools should consider publishing it on their

website to provide transparency of approach to parents, carers and pupils (HSE would expect all employers with over 50 staff to do so). A risk assessment should be updated and revisited regularly.

Risk assessment is about identifying reasonably practicable measures to control the risks in a workplace or when undertaking an activity. The process evaluates the threats and risks of a specified issue/situation and enables the likelihood that somebody could be harmed, together with an indication of how serious the harm could be, to be considered.

**Likelihood** - For each issue/situation, determine the likelihood it will occur.

**Severity (outcome)** - determine the potential injury/health.

Likelihood	Severity
4 = Certain = common or frequent occurrence	4 = Major risk - death, loss of limbs, etc
3 = Probable = likely to occur sometime	3 = High risk - broken bones, burns, etc
2 = Possible = may occur sometime	2 = Moderate risk - cuts, bruises, sickness, etc.
1 = Improbable = unlikely to occur	1 = Minimal risk - strain, shaken, no injury, etc

The matrix (below) provides a method to determine the level of risk, with the Likelihood and Severity being independently scored and plotted.

RISK LEVEL MATRIX					
PROBABILITY (LIKELIHOOD)	4	Low	High	Very High	Very High
	3	Low	Med	High	Very High
	2	Low	Low	Med	High
	1	Low	Low	Low	Low
		1	2	3	4
		SEVERITY (OUTCOME)			

Once the likelihood and severity of the risk have been assessed they are plotted on the risk profiling grid above and the risk rating defined e.g. If a risk has a likelihood of 3 – Likely and a severity of 1 – Minimal, the risk rating will be  $3 \times 1 = 3$ . This would mean the risk is low and arrangement would be adequate. Example as follows:

Issue/Area to be addressed (Potential Hazard)	Current Control Measures Good Practice Control Measures Adopted	In place (Yes/No)	Further action/ Comments	Final Risk Rating
<b>Example:</b> <b>Slips, trips and falls</b> <i>There are smooth surfaces and tripping hazards around the school site with the potential to cause persons to fall over injuring themselves with multiple injuries.</i>	<ul style="list-style-type: none"> <li>• <i>Cleaning regime in place.</i></li> <li>• <i>Correct safe substance used for surfaces.</i></li> <li>• <i>Signage available.</i></li> <li>• <i>Cleaners have received training.</i></li> <li>• <i>Introduce hazard reporting system and ensure that staff are aware of school H&amp;S Policy.</i></li> <li>• <i>Undertake specific risk assessment on snow and ice.</i></li> <li>• <i>Remove all trailing cables in admin office.</i></li> </ul>	Y	Review arrangements for new staff i.e. ensure the H&S policy to shared /communicated	<b>3x1=3</b> <b>Low</b>

**16. Impact on staff and pupils with protected characteristics and adapting your approach**
**Considerations**

- Nationally the ONS analysis has identified an increased risk of death among some ethnic groups, although this increased risk is also impacted by age, as well as gender and long term conditions like type 2 diabetes, high blood pressure and kidney disease.
- There doesn't appear to be any difference between in ethnic groups in terms of infection rates, i.e. who catches it, the difference is in the proportion who die.
- In light of this it is important for risk assessments of individuals, staff and pupils, take this into account, the main risks are around health conditions such as diabetes, kidney disease and high blood pressure, especially if poorly controlled and also obesity has been identified as a significant risk factor. The risk of death is also higher in older people over 65yrs and men have a slightly higher rate than women. Those with respiratory conditions like asthma and chronic obstructive pulmonary disease also pose higher risks, along with auto-immune conditions. Smoking can also exacerbate the disease and lead to poorer outcomes
- The NHS risk assessment suggests BAME individuals have a higher risk at a younger age, so as a rough guide consider a BAME 55yr old's risk in the same way you would consider White 65yrs old, but the biggest risk factor is existing health conditions.

- Once risks are identified then it would be sensible to work with your occupational health provider on how then to look at adjustments and whether staff can, for the remainder of term, support remote teaching or telephone support roles. This assessment will need to be on a case by case basis.
- It is less clear cut for children who are living in households with other vulnerable adults or siblings, however it is worth noting that the risk is less from younger children than older children and can be reduced through good hand hygiene. This however will be a decision that parents will need to make individually based on their personal circumstances.

Further information on Government's vaccination plan can be found here: <https://www.nhs.uk/conditions/coronavirus-covid-19/coronavirus-vaccination/coronavirus-vaccine/>

<b>Measures have not been put in place to protect staff and pupils with underlying health issues, BAME staff</b>	<ul style="list-style-type: none"> <li>• An equality impact assessment is undertaken for the school's staff and pupils.</li> <li>• All members of staff and parents of pupils with underlying health issues, those within vulnerable groups have been instructed to make their condition or circumstances known to the school, and members of staff with children who cannot attend school/nursery/childminder etc are supported.</li> <li>• Records are kept and regularly updated e.g. check children and staff who have identified as having asthma have up to date care plans.</li> <li>• Members of staff and parents of pupils with underlying health conditions have been asked to seek and act on the advice of their GP/consultant/midwife or current government advice.</li> <li>• Staff and parents of pupils are clear about the definitions and associated mitigating strategies relation to people who are classed as clinically vulnerable and clinically extremely vulnerable.</li> <li>• All staff who were clinically extremely vulnerable and received a letter should not attend work but can work from home if possible. <b>18. Home to School Transport</b>					
Urban Transport Group released a <u>briefing in May 2020</u> requesting the Government to lead joined-up dialogue between the education and transport sectors on how best to resolve the operational challenges and to meet the full additional transport costs of the return to schools and colleges. <b>Keys points include:</b> <ul style="list-style-type: none"> <li>Promote the use of sustainable travel and transport (i.e. modes that improve physical wellbeing for users and/or environmental quality) for journeys to and from education and training establishments for children and young people or compulsory school age in the local authority area.</li> </ul>

- As part of their overarching role to keep cities regions moving in a manner that protects health, the environment and quality of life, transport authorities also have an interest in ensuring that the return to school and college does not create congestion, contribute to air pollution or pose a risk in terms of the health and safety of children and their parents or of transport staff and the wider public, including passengers travelling on mainstream routes that serve schools.
- In line with this, transport authorities will be looking to ensure that children are able to safely walk, cycle or scoot to school where possible. Indeed, in normal times, transport authorities invest considerable resources in promoting mode shift for school transport and in supporting and training children to travel safely and sustainably. The need to encourage children to walk, cycle or scoot to school sitting alongside the risks posed by a rise in speeding and other dangerous driving on empty roads.

For further information and guidance regarding any of the above points visit [www.birmingham.gov.uk/modeshiftstars](http://www.birmingham.gov.uk/modeshiftstars) or contact: [connected@birmingham.gov.uk](mailto:connected@birmingham.gov.uk).

<p><b>Consideration whilst using public transport</b></p>	<ul style="list-style-type: none"> <li>• School should adopt measures to address the risks in a way that works in the local circumstances. Distancing should be maximised and mixing of groups should be minimised where possible and practical.</li> <li>• People aged 11 and over must wear a face covering when travelling on public transport. In accordance with advice from PHE, they must also wear a face covering when travelling on dedicated transport to secondary school. People who are exempt do not need to wear a face covering. TfWM has launched the “Mask up Now” campaign to promote mask wearing compliance on public transport. Further resources can be found <a href="#">here</a>.</li> <li>• Pupils should not board home to school transport if they, or a member of their household, has had a positive test result or has symptoms of coronavirus (COVID-19).</li> <li>• Pupils should leave more time for their journey, as there may be a longer wait than usual; with limited space on board there may be more demand for services.</li> </ul>	<p>n/a</p>		
<p><b>Pick up and drop off times</b></p>	<ul style="list-style-type: none"> <li>• Consider opening school gates earlier or designated entrances so parents can socially distance. Encourage parents not to gather at entrance gates or doors or enter the site unless they have a pre-arranged appointment.</li> </ul>	<p>n/a</p>

		<p>should self-test and report the result, with assistance if needed.</p> <ul style="list-style-type: none"> <li>• Staff, pupils and families are clear on reporting arrangements following the outcome of the tests. Pupils should share their result, whether void, positive or negative, with their school to help with contact tracing. Pupils with positive tests will need to self-isolate.</li> <li>• Arrangements are in place for pupils testing positive in school to be isolated until they are collected from school by a member of their family or household (travel on public transport is not advised). In exceptional circumstances, if parents or carers cannot arrange to have their child collected, if age-appropriate and safe to do so the child should walk, cycle or scoot home following a positive test result. If this is not possible, alternative arrangements may need to be organised by the school.</li> <li>• Settings which are all-through should follow the guidance on testing in secondary schools. Only secondary aged pupils and staff in all-through settings should be offered testing.</li> </ul>	n/a		
<b>20.1 Rapid asymptomatic testing in specialist settings including special academies, maintained special schools, alternative provision (AP), hospital schools, registered independent AP, pupil referral units (PRUs), special post-16 institutions, non-maintained special schools, independent special schools</b>					
<b>There is a wide range of challenges in delivering effective testing in special schools and other specialist settings</b>		<ul style="list-style-type: none"> <li>• Where it is appropriate to do so, plans are in place for to offer pupils and students aged 11 and above (including those who have been attending during the lockdown period, including vulnerable children and the children of critical workers) 3 supervised tests 3 to 5 days apart on-site before moving to home testing</li> </ul>	n/a
